My favourite animal is the elephant. They live in the African savannah and also in Asia. They are very big animals. They've got large, thin ears, long legs, two long tusks, a long trunk and 26 teeth. Their trunks are usually two metres long.

Elephants use their tusks for finding food and water. They are vegetarian. They only eat plants. They eat a lot of food: plants, grass, flowers and leaves. And they drink a lot. An elephant drinks about 210 litres of water a day!

They live in groups and they like to live near water.
They are intelligent, sociable animals.

They can live for 70 years!
